

## iX Cameras introduces the new i-SPEED Junction Box

January 26, 2019 – iX Cameras of Woburn, MA and Rochford, UK, a leading developer and manufacturer of high-speed imaging technology, announces the launch of the i-SPEED Junction Box. The i-SPEED JBOX is the ultimate tool to simplify a multi-camera setup.

Nick Paris, Head of Application Engineering of iX Cameras said, “The design and engineering of the i-SPEED JBOX has been developed with our customers who needed to use multiple high-speed cameras in an outdoor environment or in a laboratory setting. Both versions allow the user to connect, synchronize and control up to four i-SPEED cameras with a single cable to each camera, reducing the complexity of setup and saving time. It is essentially a plug and play solution.” Available in two versions, Instrumentation and Rugged, the JBOX simplifies the connection of up to four

i-SPEED cameras (any combination of i-SPEED 7, i-SPEED 5, and/or i-SPEED 203). The i-SPEED JBOX provides a reliable, robust connection for data capture with easy-to-use design and innovative features. The JBOX can be used in any laboratory facility or outdoor setting. ## About iX Cameras

iX Cameras is a world-leading technology and product company specializing in the field of high-speed (slow motion) imaging. Based on proprietary innovative technologies, we design, build, and sell cutting-edge ultra-fast cameras and value-added software for a wide range of advanced scientific research applications. The company is a wholly owned spinoff of the heralded Olympus industrial division, combining the acumen of the engineering visionaries from Olympus with a new team of industry veterans, continuing to innovate technologically advanced i-SPEED cameras under the iX Cameras name. Sales, service, and support of all i-SPEED camera models can be obtained from regional offices located in the United States, United Kingdom, China, and India.
