IX CAMERAS INTRODUCES NEW HIGH-SPEED CAMERA MODEL

September 5, 2018 – iX Cameras of Woburn, MA and Rochford, UK, a leading developer and manufacturer of high-speed imaging technology, announces the addition of a new high-speed video camera, the i-SPEED 508. This compact high performance camera comes packed with unique features such as an environmentally sealed body, innovative internal cooling system, custom CMOS image sensor, unparalleled memory capabilities and many more features making the 508 the perfect balance between speed, size, and memory.

Peter Carellas, President and CEO of iX Cameras said, "iX Cameras has always been driven by the singular goal of providing our customers with outstanding value – and the model 508 is no exception. Our engineers were able to abstract some of the advanced technologies from our ultra-fast 7 series cameras to make the mid-range 508 a game changing high-speed, high-value camera. Adding a custom sensor and a sealed cooling system, the 508 is a new platform for innovation."

Key Features

- Full 1080p HD resolution up to 3,980fps at 12-bits
- 8.4 GPixels/second throughput
- Environmentally sealed unit
- Up to 144GB of internal video RAM for long duration recordings or multiple buffers
- Up to 8TB internal SSD
- Up to 2TB external SSD for fast data transfer and large storage capacity
- Live video during recording
- High light sensitivity
- Maximum memory up to 144 GB
- Maximum frame rate 500,000 fps

About iX Cameras

iX Cameras is a world- leading technology and product company specializing in the field of high-speed (slow motion) imaging. Based on proprietary innovative technologies, we design, build and sell cutting-edge ultra-fast cameras and software for a wide range of advanced scientific research applications. The company is a wholly-owned spinoff of the heralded Olympus industrial division, combining the acumen of the engineering visionaries from Olympus with a new team of industry veterans, continues to innovate state-of-the-art i-SPEED cameras under the iX Cameras name. Sales, service and support of all i-SPEED camera models can be obtained from regional offices located in the United States, United Kingdom, China and India.
