

TECH NOTE

The i-SPEED 230 camera has 2 modes of recording operation: Single and Ring Mode.

In Single Mode the camera stops recording when the internal buffer is full.

- Burst recording is available.
- Trigger (Pre/Post) position is NOT available.
- Segmented memory (purchase option) is NOT available.

In Ring Mode the camera records in a circular manner until a trigger signal stops the recording.

- Burst recording is NOT available.
- Trigger (Pre/Post) position is available.
- Segmented memory (purchase option) is available.
